Dear Madame Mouroux:

A letter from Professor Thomas E. French of the Ohio State University at Columbus, states that two members of a committee having in charge a preparation of dies for a medal, would be interested in seeing photographs of your work if you have such available. I ventured to suggest to them that they would have no reason to regret commissioning you to execute a medal for them, but as in all matters of this kind there are many complications, it may lead to nothing positive. If, however, you do have some inexpensive reproductions of your work which you could send to them, it might lead to something. You could, of course, ask to have them returned if you so desire.

Very truly yours,

Secretary
